“ This machine enables us to produce ‘Mill Size Bales’, it’s a universal language which grabs the attention of a buyer straight away. We now have 2 balers due to the volumes of our material; we use it for polypropylene hessian sacks & cardboard, giving us a good increase on the rebates we get for the material. The machines are low maintenance & simple to use with a one man operation. Pearce Compaction Systems provide a good service, with consumables always delivered the next working day.
