

Compaction Catch Up

June 2024

Welcome to the June 2024 edition of Compaction Catch Up, our monthly update on how the business is doing. We aim to show off our production capabilities as well as our superb team.

- Steve attended a golf tournament at one of our suppliers in Denmark, cleverly disguised as a networking event. The high-quality equipment they provide integrates fantastically with our systems. The timing of the visit was perfect, allowing him to catch the England V Denmark match during his stay.
- We are thrilled to announce that we have secured an important tender! A big thank you to our Ops Manager Andy for his hard work on this. Once all the paperwork is finalised, we will share more details about this special site.
- One of our Waste Management Specialists, Keith Rapp recently participated in the Bedford Chamber of Commerce Summer Reception, where he showcased our ECObed product from our parent company Pearce Group at a stand alongside various other local businesses.
- We have been experimenting with videos on our social media platforms, and the response has been positive so far. We plan on creating more videos in the future on a variety of topics.

Compaction Catch Up

June 2024

Many of the machines we sent out this month had something bespoke done to them. Our engineer Ashley was on site for most of these installs to make sure they went smoothly.

- Our engineers have serviced 89 balers and compactors.
- We installed 22 compactors and balers, across 14 sites.
- We received a delivery of 10 mobile and static compactors that are now available for refurbishment.
- Steve treated us to what we wanted from the food van for breakfast (second breakfast for some of us).

Most important meal of the day!

SC3000BL Rear Ground Bin Lift, not a common set up but works perfect in the right situations.

HB550 Mill Size Baler with the bottom door hinged the opposite way from standard.

SC3000 with a modified turnbuckle.

Both on the transport ready to get delivered and installed

Compaction Catch Up

June 2024

2x MC32BL Mobile Compactors with Bin Lift. With an upgraded SolarPac, SmarTec, Flip-Over Cages and 2 side doors.

2x MC32BL Mobile Compactors with Bin Lift. With an upgraded SolarPac, SmarTec, Flip-Over Cages and 2 side doors.

DC205 Drum Crusher with a fast cycle module upgrade. As this one was for a site further North Guy Saunders installed this one.

Refurbished Static Compactor designed for emptying bins with a fork lift

HB550 Mill Size Baler with an additional Padlock shackle on the top door to prevent unauthorised use.

MC32BL Mobile Compactor with Bin Lift with added Greedy Boards for a site with a lot of crosswinds.
